Bridging the Atlantic divide – Haseltine Lake hosts patent masterclass

Major European patent and trade mark attorney firm, Haseltine Lake, hosted its third annual masterclass titled “Bridging the Atlantic divide - making the most of patenting opportunities in the US” at the Royal Society of Chemistry in central London yesterday.

In-house IP practitioners from leading European companies and technology transfer organisations, representing a wide range of industry sectors, attended the half day masterclass, which focused on the differences between US and European patent practice and provided ideas and approaches for maximising opportunities and avoiding pitfalls. The seminar was in a discussion format between European and US attorneys, with delegates encouraged to share their own experiences and steer the discussions towards issues of practical concern to them.

The keynote speakers at the event were Jim Huffman of Huffman Law Group and James Velema of Lathrop & Gage LLP – both from the US – who joined the Haseltine Lake team of experts to explore ways for European practitioners to bridge the “Atlantic divide” and maximise their success in US prosecution across the electronics, engineering, chemistry and life sciences sectors.
